

IMMUZONE[®]

HERBAL IMMUNOSTIMULANT

Aquatic Feed Supplement

IMMUZONE is derived from a group of terrestrial plants through extraction process. **IMMUZONE** acts as an Immunostimulant in shrimp by increasing the defensive mechanism of the animal by way of enhancing hemocytic activities of shrimp. This is evident from the higher levels of Pro-phenol oxidase and nitric oxide in the shrimp after the ingestion of **IMMUZONE** while feeding.

BENEFITS

IMMUZONE improves health and growth of shrimp in ponds, if used prior to:

- a) Situations known to result in stress of animals due to change of water quality parameters.
- b) In the case of high risk due to exposure of pathogens.
- c) During regular molting when animals are particularly susceptible to infectious agents.
- d) It should be used to elevate the general defense barrier of the organism.

APPLICATION

Mix 10 gm of **IMMUZONE** gel mixed with three times of fresh water and add to 1 kg of feed, dry for 30 minutes before broadcasting or as suggested by aquaculture consultant. Binders are not required.

DOSAGE

To be given 2 times per day for 7 days and break for 5 days continue throughout culture period. This administration is recommended based on the extensive research both in lab and field by evaluating various immunological parameters in shrimp fed with **IMMUZONE**.

Developed by Dr.A.S.Sahul Hameed under Department of Biotechnology (Govt. of India).

STORAGE

IMMUZONE must be stored in cool, dry place away from direct sunlight. Do not store continuously above 40°C. Variations in the product's color will not impact its performance.

PACKING

Available in 500 gm, 2kg, 3 kg, 5 kg & 20kg plastic container.

Registered with Coastal Aquaculture Authority as antibiotic free product **Reg.No: CAA/M16/IMMU/00357**

FREE FROM ANTIBIOTICS
FOR AQUACULTURE USE ONLY / NOT FOR HUMAN USE / NOT FOR MEDICINAL USE
