

TURBIDEX

Probiotics for Turbidity Control
Aquatic Feed Supplement

CONTENTS

Turbidity is a key indicator of the amount of suspended sediment in the water, which has numerous negative effects on aquatic organisms. In *L.vannamei* intensive farming, increased water turbidity is one of the environmental stressors. TURBIDEX is a probiotic and yeast strain mixture that excels in reducing the organic load built up by waste products. TURBIDEX bacteria may thrive in environments with low oxygen levels and aid in the clearing of water turbidity.
