

ZoothaQill-DS[®]

MULTI FUNCTIONAL DISINFECTANT

Ciliate infestation can affect shrimps during culture and is brought on by the protozoa Vorticella, Epistylis, Zoothamnium, Acineta, or Ephelota. When the protozoa are abundant, the shrimp also feel lack of appetite and may find it difficult to move. Respiratory issues can develop when protozoa are found in the gills, particularly when the levels of dissolved oxygen are low. ZoothaQill-DS selectively kills the protozoan and also delay the reoccurring duration. ZoothaQill-DS also reduces the population of Gregarine like species in pond environment. If white faeces arises due to *Gregarine sp.* will be controlled by application of ZoothaQill-DS.

BENEFITS

- ✦ To reduce Zoothamnium and other parasites
- ✦ Improves the shrimp/prawn health
- ✦ Controls all type of pathogenic bacterial disease

INGREDIENTS

Polyphenols, Terphenyl compounds, Alkaloids and Quaternary ammonium compounds mixture.

DOSAGE

Direct Application : Mix ZoothaQill-DS 0.3 to 0.5 Liter/Hectare with required quantity of water and apply throughout the pond or as suggested by aquaculture consultant. Variations in the product's color will not impact its performance.

STORAGE

ZoothaQill-DS must be stored in cool, dry place away from direct sunlight. Do not store continuously above 40°C.

CAUTION

Do not use along with other alkalies, soaps and detergents. Avoid exposure to direct sunlight. Avoid direct contact with skin, eye and clothing. No liability is accepted for accident arising in handling and usage.

PACKING

Available in 500ml container.

Registered with Coastal Aquaculture Authority as antibiotic free product **Reg.No: CAA/JUN23/DIS/04960**

FREE FROM ANTIBIOTICS
FOR AQUACULTURE USE ONLY / NOT FOR HUMAN USE / NOT FOR MEDICINAL USE
